PROFESSIONAL SUMMARY

Results-driven Engineering Manager and Full Stack Developer with 2.5+ years of experience at Xperion, delivering scalable, AI-powered software solutions. Proven expertise in leading agile engineering teams, architecting microservices with NestJS and GraphQL, and orchestrating autonomous AI agents to automate end-to-end development workflows. Passionate about building high-performance systems at the intersection of cloud infrastructure and cutting-edge LLM technologies.

CORE COMPETENCIES

Engineering Leadership: Agile Delivery · AI Agent Orchestration · Team Mentorship · Resource Planning

Backend Development: NestJS · [Node.js](https://nodejs.org/) · .NET Core / C# · Python · GraphQL

Frontend Development: [Next.js](https://nextjs.org/) · React · Angular · TypeScript

Cloud & AI: AWS (EC2, S3) · Supabase · OpenAI / Anthropic LLMs · RAG Architectures · pgvector · Pinecone

Databases: PostgreSQL · SQL Server · MongoDB · TypeORM

PROFESSIONAL EXPERIENCE

Engineering Manager / Senior Software Engineer

Xperion | Nov 2023 – Present | Islamabad, Pakistan

- Led and orchestrated autonomous AI agent pipelines to automate software delivery cycles, reducing manual engineering overhead and accelerating release timelines.
- Architected scalable microservices using NestJS and TypeORM, implementing complex multi-tenant business logic, role-based access control, and comprehensive audit logging.

- Designed and maintained high-performance GraphQL Gateways, unifying data access across distributed microservices and improving API response consistency.
- Managed AWS infrastructure (EC2, S3) including CI/CD deployment pipelines, ensuring 99.9% uptime.
- Mentored junior and mid-level engineers through code reviews, technical workshops, and agile sprint planning.

Software Engineer

Thathal Information and Technological Solutions | Feb 2023 – Jun 2023 | Pakistan

- Spearheaded architectural migration from React to [Next.js](#), improving SEO scores by 40% and reducing page load times by 35%.
- Converted legacy JavaScript codebases to TypeScript, eliminating runtime errors and improving maintainability.
- Decomposed monolithic backend into microservices, enabling independent scaling and AI edge function integration.
- Optimized database queries and refactored bottleneck code paths, achieving 50% improvement in application performance.

Web Developer & Social Media Specialist

Onset Media Agency | Nov 2018 – Jun 2021 | Florida, USA (Remote)

- Built and maintained responsive WordPress websites with optimized UX/UI for multiple client brands.
- Managed web hosting infrastructure and DNS configurations, ensuring minimal downtime and reliable performance.

KEY PROJECTS

ComVE – Commonsense Validation & Explanation: Fine-tuned an OpenAI GPT model using CLM, augmented with a RAG pipeline and vector embeddings for contextual reasoning.

LMS – School Management System: Full-scale system using Angular and .NET Core, integrated with Supabase for real-time data synchronization.

Urdu-to-English Neural Translation: Transformer-based encoder-decoder model using Python and Flask for accurate bidirectional translation.

EDUCATION

MS Cyber Security – National University of Computer and Emerging Sciences (FAST-NUCES) | 2024 – 2026

BS Computer Science – National University of Computer and Emerging Sciences (FAST-NUCES) | 2017 – 2023

CERTIFICATIONS & TRAINING

- [Claude Code in Action](#) | Anthropic Training | 2026
- [Introduction to Agent Skills](#) | Anthropic Training | 2026
- [Model Context Protocol: Advanced Topics](#) | Anthropic Training | 2026
