Innovative Full Stack Developer with Expertise in End-to-End Solutions, API Integration, and Agile Project Delivery

Work Experience

Software Engineer (Remote, Contractual)

Digital Security Network | July 2023 – Present

- Full stack developer delivering tailored solutions aligned with project goals and client expectations.
- Developed a flight log book application with **Supabase for database management and API integration**, React for the frontend, and Node.js for the backend.
- Enhanced application functionality by **integrating LLM-based APIs** for smart data retrieval and contextual insights.
- Worked on a Point of Sale system using PostgreSQL and .NET C#, ensuring a robust and user-friendly interface.
- Collaborated on end-to-end development, from database design to frontend implementation, ensuring seamless user experience.

Software Engineer

Thathal Information and Technological Solutions | Feb 2023 -June 2023

- Migrated projects from React to Next.js and transitioned codebases from JavaScript to TypeScript, resulting in more maintainable and performant applications.
 - Transitioned systems to **microservices architecture**, enabling future integration with AI agents and Supabase edge functions.
 - Maintained and optimized databases for better query performance and scalability.
 - Improved load times by 50% through targeted optimizations and code refactoring.
-

Social Media Specialist / Web Developer

Onset Media Agency, Florida, USA | Nov 2018 – June 2021

- Designed and maintained WordPress websites with responsive UX/UI and strong performance optimization.
 - Managed social media platforms and produced engaging digital content to enhance brand visibility.
 - Provided hosting and technical support, ensuring minimal downtime and reliable web infrastructure.
-

Projects

- **LMS using Angular and .NET:** Developed a school and student management system with Angular and .NET, streamlining tasks and enhancing user interaction. *(Extended with Supabase for authentication and real-time features.)*
 - **Text Editor and Image Editor:** Created modern editors with formatting, editing, and saving functionality using web technologies.
 - **Photo Editor:** Built a photo editor with HTML, CSS, and JavaScript, including image selection, filter application, and save options.
 - **DB Project: "Hamare Bachay":** Designed a complete NGO management system using SQL, HTML, and PHP, integrating both backend and frontend solutions.
 - **Commonsense Validation and Explanation (ComVE):** Trained an OpenAI GPT model with causal language modeling (CLM). *(Enhanced with embeddings and a basic RAG pipeline for contextual reasoning, demonstrating LLM integration.)*
 - **Machine Translation of Urdu to English:** Implemented a transformer-based encoder-decoder model in Flask for machine translation.
-

Education

National University of Computer and Emerging Sciences – Islamabad, Pakistan

- **BS Computer Science** | Aug 2017 – Jan 2023
 - **MS Cyber Security (Ongoing)** | Aug 2024 – June 2026
-

Technical Skills

- **Languages & Databases:** Python, C++, C#, TypeScript, SQL, PostgreSQL, MySQL, SQL Server, MongoDB
- **Frameworks & Tools:** MERN Stack, MEAN Stack, .NET, Next.js, Supabase, Deno, Docker, Jenkins, GitHub, VS Code
- **AI & Data:** LLM Integration (OpenAI), RAG Architectures, Embeddings Management, Vector DBs (Pinecone, Weaviate, pgvector), Transformers & NLP
- **Soft Skills:** Leadership, Problem Solving, Project Management, Communication, Creativity
